

Building a Mobile App is not a Mobile Strategy.

Discover new opportunities for engagement, growth, and productivity with choice of user's own device.

Mobile adoption among employees across devices and applications is changing the workplace including operations. Users expect to be able to switch among desktops, tablets, or smartphones at their convenience. The rapid trend towards mobility is driving business to move the next level of technology usage and think about mobile first while delivering business applications.

Our Mobility Consulting services can help you simplify your end-user experience and extend your backend applications by providing Enterprise Mobility with simple and complete mobile solutions.

Mobile Solutions

Our Mobile Solutions allow organizations to securely provide access to the applications and data their employees need to do their jobs effectively no matter where they are or what devices they use.

Our solutions help to engage your workforce, simplify processes and create value for them. Our team's depth of knowledge and subject matter expertise across the full IT spectrum enables us to align your business drivers and offer a range of solutions. We have created Center of Excellence that is focused on innovation in the mobile technologies.

We offer an array of solutions that improve visibility, control over field operations, mobilize asset-centric or paper-intensive tasks, unify processes and integrations across your backend systems and provide a truly simplified user experience.

Benefits of Mobile Solutions

- Powerful and robust field service management functionality.
- Real-time inclusion in business processes.
- Empowers field workers to log work even in remote offline areas.
- Access critical business information on the fly.

Oracle Mobile Cloud Services

Sofbang uses the Oracle Mobile Cloud Service (MCS) to provide the platform, security, analytics, toolsets and applications for a robust mobile backend as a service (MBaaS) solution.

Mobile Needs Assessment

We assess the current mobile state of the enterprise and define the target state, identify gaps and establish a realizable roadmap for an enterprise mobile strategy.

Why Sofbang for Mobility?

We have received multiple awards for developing innovative solutions and delivering outstanding value, including being awarded the prestigious Oracle Excellence Specialized Partner of the Year: Mobility Solution – North America 2015.

Our Mobile Cloud Service (MCS) QuickStart program provides the services needed to develop a comprehensive strategy for mobile app development, integration, mobile management, and delivery.

At Sofbang, we have a seasoned team of Oracle MCS experts actively working on Oracle MCS from the time it was introduced. We have built our own Sofbang Solution Center of Excellence (SSCOE) running our purchased versions of the suite of Oracle Cloud Services, including Oracle MCS that allow us to closely understand its environment, reduce development time and mitigate our customers' risks. We have expertise in leveraging Oracle MCS for developing scalable, robust and secure mobile applications, providing seamless integration with existing systems and other cloud services. At Sofbang, we have mastered the art of simplifying enterprise mobility by providing an easy-to-use platform, security, analytics, toolsets and applications for a robust mobile backend as a service (MBaaS) solution using the Oracle Mobile Cloud Service (MCS).

Bespoke Solutions

Our bespoke mobile solutions allow us to create apps leveraging Oracle Mobile solutions. We work with our customers to identify and assess their mobile needs and conceive, design and build apps tailored to their precise business purpose, with secure backend integrations that are easy to use and easy to update.

Why Sofbang?

Founded in 2000, Sofbang is an Oracle Platinum Partner providing Oracle Fusion Middleware, Mobile & Cloud solutions to clients in the Public, Education and utility sectors, as well as the growing enterprise and mid-market commercial space. Sofbang specializes in providing customers with dynamic business process extensions, enterprise mobility and cloud solutions which extend, integrate and simplify enterprise business applications across an organization.
